

Quick Read Should Aims To:

Provide A Fast, Distraction-Free Summary Reading Experience.

Observation:

The Article Image Takes A Large Portion Of The First Screen.

UX Issue

It Delays Access To The Actual Quick Content, Which Weakens The “Quick Read” Promise.

*In Quick Read Mode, Speed Of Information Should Be Prioritized Over Visual Storytelling.*

Article Image Is Very Important — But In Quick Read, Content Should Lead, Image Should Support.

OR

I Recommend YouTube Like Thumbnails: (Do Not Feel Clickbait)

- Communicate Story Instantly
- Reduce Cognitive Effort
- Increase Curiosity
- Support Fast Decision Making

This Perfectly Achieve Quick Read’s Purpose.

Content Density & Line Length

Observation:

Paragraphs Are Long And Dense.

UX Issue

Quick Read Is Supposed To Be Quick, But Text Still Feels Heavy.

UX Impact

Users May Skim Or Exit Early.

Recommendation

Break Into Bullet-Like Short Paragraphs

Updated” Label Placement

Observation:

Time Stamp Is Very Small And Visually Weak.

UX Issue

Freshness Is A Strong Trust Signal But Currently Under-Emphasized.

Recommendation

Increase Contrast

CTA Hierarchy Problem

Observation:

Exit Button Is More Visually Dominant Than Continuation.

UX Issue

Users May Exit Instead Of Continuing Reading Journey.

Recommendation

- We Can Make It Exit Secondary (Outline Style)
- Make “Read Full Story” Primary
