1. **Too Many Items (Cognitive Overload)**

   Users Can't Quickly Decide Where To Go.

2. **No Clear Prioritization**

   NEWS, PREMIUM, GLOBAL, MOVIES, ASTRO, Etc. All Compete.
   Everything Looks Equally Important.

3. **Horizontal Scrolling / Overflow (...)**

   Hidden Items Behind = Low Discoverability

4. **No Personalization**

   Same Nav For All Users

Recommended UX Improvements

Max 6–8 Primary Categories

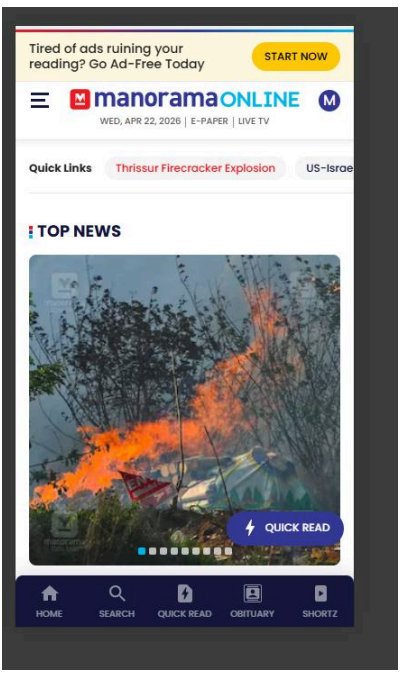
Sections" is now positioned closer to primary navigation, making it:

Reduced Cognitive Load

All secondary and deep navigation is consolidated under "Sections"

Also Behavior-Based Personalization Improves Relevance

The top navigation can be dynamically adjusted based on user reading behavior.



Removed the top navigation from mobile view ensures a clean and focused interface

All categories and deep navigation are consolidated under the "Sections" (hamburger menu).
