1. Color and UI styling should match the given design.

2. Add labels for each reader option/control as specified in the design.

3. Combine the Scroll View and Horizontal View options into a single toggle/control, as shown in the design.

4. Use the same arrow icon as specified in the design. No additional background/ shadow is required for the arrow icon.

5. Page navigation should use a simple page transition. A page-change animation is not required.

6. Increase the spacing between the left and right navigation arrows. They are currently too close to the page/content area.

7. Page thumbnail preview is missing.

9. View mode switch confirmation toast is missing.

10. Consider implementing an auto-hide header to maximize the reading area. The header can hide after a few seconds of inactivity and reappear when the user moves the cursor to the top.

11. Mobile responsive design not matching with given design
