1. **Color and UI styling should match the given design.**

use same icon from design

2. **Add labels for each reader option/control as specified in the design.**

3. **Combine the Scroll View and Horizontal View options into a single toggle/control, as shown in the design.**

4. **Use the same arrow icon as specified in the design. No additional background/ shadow is required for the arrow icon.**

5. **Page navigation should use a simple page transition. A page-change animation is not required.**

6. **Increase the spacing between the left and right navigation arrows. They are currently too close to the page/content area.**

7. **Page thumbnail preview is missing.**

9. **View mode switch confirmation toast is missing.**

10. **Consider implementing an auto-hide header to maximize the reading area. The header can hide after a few seconds of inactivity and reappear when the user moves the cursor to the top.**

11. **Reader controls are missing in Full Screen mode. The left-side reader controls available in the standard view should also be accessible in Full Screen mode.**

12. **Mobile responsive design not matching with given design**
