1. Use the attached arrow icon and remove the box shadow.

https://assets.manoramahorizon.com/uploads/media/2026/08/website/Group%2011496.svg

2. Increase the spacing between the left and right navigation arrows. They are currently too close to the page/content area.

2. Color correction

3. Icons are low quality : use svg icon

4. Use the left panel in full-page view.

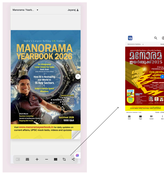
5. Increase the width of the page thumb scrollbar for better visibility and usability.

6. Consider implementing an auto-hide header to maximize the reading area. The header can hide after a few seconds of inactivity and reappear when the user moves the cursor to the top.

7. Combine the horizontal and vertical view controls into a single button.

8. Show a toast message when switching between reading modes to clearly inform the user about the change.

9. Reduce the number of options in the bottom navigation bar to simplify the interface.



10. Adjust the arrow position as shown in the reference and provide sufficient spacing between the arrow and the page content.

11. Maintain equal spacing at the top and bottom of the page. On a real device, the current spacing makes the page appear as if it is scrollable.

12. Page navigation should use a simple page transition. A page-change animation is not required.

13. Need quick page navigation.

14. Add label for each controls
